WORK EXPERIENCE

Back-end Developer (Intern) | UOL

May 2025 – Oct. 2025

Technologies: Java, Spring Boot, Docker, Microservices

- Contributed to the microservices development lifecycle for high-availability systems.
- Developed and maintained robust REST APIs and system integrations.
- Implemented Docker containerization for development and production environments.
- Collaborated in agile environments with a focus on continuous delivery and version control via Git.

FEATURED PROJECTS

PWNED Project | CyberSecurity EdTech Platform

Java, Spring Boot, Docker

- Developed the back-end core using **Hexagonal Architecture** to ensure decoupling of business rules.
- Managed rigorous development workflows using **Git Flow** (feature, develop, release, and master branches).
- Implemented polyglot persistence: **PostgreSQL** for transactional data and **MongoDB/Redis** for caching and performance.
